IMPORTANT

*At Glass World we aim to build and install quality products from start to finish. Our products are handmade so you can expect a tolerance of $\pm \frac{1}{4}$ " on all measurements. If you are uncertain of measurements please feel free to reach out and verify with us.

As a precaution we recommend you have the product in hand before installing any plumbing, carpentry, rough ins and fixtures. This allows for all additional counterparts to be installed properly in cohesion with your product.

If you do find any inconsistencies please reach out to us at info@glassworld.ca.
